

# National Breast Imaging Academy Mammography Associate Training Programme

**Develop your  
Mammography  
workforce**

## Training at the NBIA

Training at the National Breast Imaging Academy (NBIA) offers trainees:

- Training by experts at the Nightingale Centre, Manchester, one of England's leading breast units, in one of the largest Trusts in the UK.
- Blended learning programme:
  - Classroom  
Three study days are held at the beginning of the training programme, with a further three study days held throughout the duration.
  - Online  
Five online study sessions are held through the duration, self-directed online learning is also required.
- Access to the NBIA Academy Online Learning Hub

Practical training will primarily be 'on-the job' and employer led however, a 2-day clinical placement at the Nightingale Centre within the first few months of the programme, followed by a 1-day clinical placement mid-programme is recommended. The course cost is £7000 per trainee.

## Mammography Associates

Mammography Associates work within Breast Screening Programmes and symptomatic services undertaking routine two-view mammography, producing images of consistently high quality to meet rigorous standards.
